PROBLEM STATEMENT - 2

ADDRESS UPDATE CHALLENGE IN URBAN AREAS

ABSTRACT:

In this scenario , The tenant want some basic needs like gas connection ,smart card, broadband etc., for that he/she wants to update their address in aadhar card for current location. To update address in aadhar card they need some proof, so they asked for an acknowledgement letter to landlord via online mode(mail). The acknowledgement letter should contain tenant details, an acknowledgement statement that he/she were staying in landlord's property, landlord details and his signature.

After receiving the acknowledgement letter, he/she should visit UIDAI official website. In that website we are adding a new option for tenant to update their address. In that option they should submit the acknowledgement letter, address details and finally landlord's aadhar number (with his permission) . After completing the above(mentioned) steps , a confirmation link will be send to the landlord's registered mobile number (the link will be valid for 24 hours). The confirmation link contains tenant details and his updated address. After landlord's approval the address will be updated successfully and then the aadhar card will be dispatched to his/her updated address.

PROBLEM STATEMENT - 3.1

ADDRESS UPDATE USING SUPPORTING DOCUMENT

OBJECTIVE:

The main intension is to add the missing locality name in the address column of aadhar details and to make it complete and usable for society.

ABSTRACT:

For the current scenario, I have moved from rural area to urban area (Mumbai) and I have signed a rental agreement with the landlord for accommodation. It mostly covered up all the address details in that agreement paper except locality area (nagar). To update the missing details (nagar) we have to submit the supporting documents like Electricity bill and LPG Cylinder bill or Tax papers (House/Water).

The above steps can be done by the resident through online mode with the help of UIDAI official website. In that website we have to create a new option to add missing details like locality name. In that newly framed option the resident should select the supporting document type (Electricity, LPG bill). Then he/she should add the bill number and the scanned copy of a document (In the format of Pdf or JPG). After entering the above (mentioned) details with the help of phone/tab GPS, he/she can upload their locality details in official website. After the verification of UIDAI officials, the resident aadhar card will be dispatched to his/her residential address.
